

# Cutawl® K-12

## The Diemaker's Saw

- New powerful ¼ HP High Torque Motor
- Curved or flat base plate
- Designed for making rotary or flat dies
- Special rigid guide foot for straight, perpendicular cuts
- Unique 360° swivel cutting action
- Heavy-duty 4 point blades plus our standard 2, 3, and 4 point blades
- Extra length blade for 4 pt rotary diemaking
- New V Belt for added torque, less slippage

### DESCRIPTION

The K-12 Diemaker's Saw is a high-speed, portable, precision saw especially designed for making rotary or flat dies. It cuts hard maple or birch die board quickly and easily. Straight lines, curves or intricate patterns are simple to cut with the free-floating 360° swivel head. The curved base plate for making rotary dies is of high-quality, one-piece cast aluminum. The flat base plate is made of stainless steel.

A special rigid guide foot has been designed for use with Cutawl's new heavy-duty 4-point #34HD, #44HD and #44HDL blades (.042" thick). These long-life blades will consistently make straight, perpendicular cuts in die board and plywood.

### STANDARD EQUIPMENT & PRICING

CURVED BASE PLATE		FLAT BASE PLATE	
MODEL K-12C-66 w/66" Base Plate	\$685.00	MODEL K-12F	\$655.00
